

AT9S

Hydraulic Flange Alignment Tool only Kit

The AT9 is a Hydraulic flange alignment tool designed for medium and large flanges that is used to correct:

- **linear misalignment**
(when the axis of the two flanges are not aligned).
- **rotational misalignment**
(when the axis of the flanges are aligned but the bolt holes are not).

The AT9 can produce a maximum reaction alignment force of 90kN (9T) when the maximum hydraulic pressure of 10,000psi (700Bar) is applied to the tool.

- Tool weight 14.5Kg (32.0lbs)
- No external anchor points or rigging required.
- Can be used to prevent misalignment during flange joint maintenance.
- Bearings rated to provide overload warning.
- 100% Load/Pressure tested and certified.
- Prevents gasket pinching during flange joint assembly.
- High durability High Quality low Maintenance design.
- Supplied with pressure rated and capacity matched pump for safety.
- Robust Moulded Case for easy transportation and storage.
