

FSW BRONZE

SPARK RESISTANT FSW JAWS and STEPPED BLOCKS

RenQuip have developed Jaws and stepped blocks for use with the FSW range of flange Spreaders to reduce the risk of sparks when operating in hazardous areas.

The Jaws and Stepped blocks can be retrofitted to FSW17 and FSW9 tools.

The contact areas between tool and flange are of a bronze material that is classified as nonsparking but the core material of the components remain as forged steel to maintain the strength and factor of safety of the tool.

Bronze Jaws

Product Part Number :
153400002

- 2 x Bronze Jaws complete with spiral pins

Bronze Stepped Blocks

Product Part Number :
150200002

- 2 x Bronze Stepped Blocks complete with securing screws
